… they contain the Cs in the bass-line, along with the bs that inflect them

… triggered by the strongest subdominant event of the passage, the bass-and-root F.

… triggered by and prolong the big dominant tonal event, bass-and root e.

David Lewin: On Harmony and Meter in Brahms's Op. 76, No. 8

-both the metric relation of 6/4 to 3/2 and that of 6/4 to 12/8 involve the play of the ratios 2:3 and 3:2. And these are the same ratios involved in pitch relationships of a fifth, the dominant and subdominant relations to a tonic pitch

-the relation of 6/4 to 12/8 inverts … the relation of 6/4 to 3/2, … is numerically analogous to the inversion of tonic-dominant and tonic-subdominant pitch relations

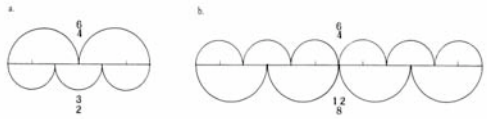

Figure 1

David Lewin: On Harmony and Meter in Brahms's Op. 76, No. 8

We must not try to push too far the tonal analogy for these figures.

The idea of a deep affinity between pitch and time is as Platonist as the Wendisch Mägdelein's vision of eternal love. … am I suggesting, that such relationships are more eternal than iron and steel? … I am not altogether sure.

Johannes Brahms

Max Frisch:

The main theme … begins to project a metrical profile, but one that fits more clearly into 3/2 than 6/4. Only in bar 7 is the duple division of the bar firmly supported in all parts: the theme, the motto, and the harmonic voices move every half bar.

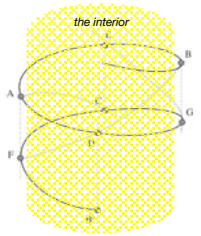
Modeling Tonality

Spiral Array (Chew 2000)

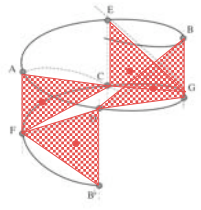


$$\mathbf{P}(k) \stackrel{def}{=} \begin{bmatrix} x_k \\ y_k \\ z_k \end{bmatrix} = \begin{bmatrix} r \sin \frac{k\pi}{2} \\ r \cos \frac{k\pi}{2} \\ kh \end{bmatrix}$$

USC Viterbi School of Engineering

Modeling Tonality

Spiral Array (Chew 2000)

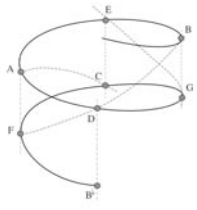


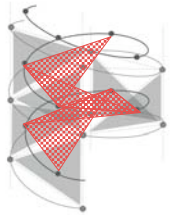
$$\mathbf{C_M}(k) \stackrel{def}{=} w_1 \cdot \mathbf{P}(k) + w_2 \cdot \mathbf{P}(k+1) + w_3 \cdot \mathbf{P}(k+4),$$
$$\text{where} \quad w_1 \geq w_2 \geq w_3 > 0 \text{ and } \sum_{i=1} w_i = 1.$$

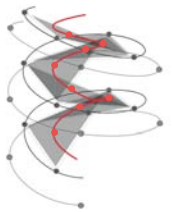
USC Viterbi School of Engineering

Modeling Tonality

Spiral Array (Chew 2000)







$$\mathbf{T_M}(k) \stackrel{def}{=} \omega_1 \cdot \mathbf{C_M}(k) + \omega_2 \cdot \mathbf{C_M}(k+1) + \omega_3 \cdot \mathbf{C_M}(k-1),$$
$$\text{where} \quad \omega_1 \geq \omega_2 \geq \omega_3 > 0 \text{ and } \sum_{i=1} \omega_i = 1.$$
