what is a hybrid
"something made up of different elements or components"

why a hybrid
development of diverse programs and usage when sharing the same site can activate a neighborhood, encourage the use of a site for a greater number of hours per day and therefore create a safer and more efficient environment.

a hybrid
Salvation Army Hostel  Le Corbusier  Paris, France  1933

hybrid solution
Creates a space that ‘filters and distributes people according to diverse criteria of age, sex, need and qualification’. The building provides temporary lodgings for itinerant workers, vagabonds, and refugees. It contains such a range and diversity of functions it constitutes a veritable city itself; spaces for between 500 to 600 residents, a kitchen, restaurant, and workshop spaces for the rehabilitation of the workforce.
