Peter Gordon is a Professor in the University of California's School of Policy, Planning and Development. He is also attached to USC’s Center for Risk and Economic Analysis of Terrorist Events.

Gordon's research interests are in applied urban economics. Gordon and his colleagues have developed various economic impact models which they apply to the study of the effects of infrastructure investments or disruptions from natural events or terrorist attacks.

Peter Gordon has published in most of the major urban planning, urban transportation and urban economics journals. His recent papers are at www.rcf.usc.edu/~pgordon. He has consulted for local, state and federal agencies, the World Bank, the United Nations and many private groups. Gordon received the Ph.D. from the University of Pennsylvania in 1971.

RECENT RESEARCH AND SCHOLARSHIP

“Private Communities, Market Institutions and Planning” (with F. Frederic Deng and Harry W. Richardson) in Niraj Verma (ed.) Institutions and Planning. CUPR Press, Rutgers University. (forthcoming)
